A Note from the Director...

Good evening, and a warm welcome to our Spring Concert!

As we come to the end of the school year, it's hard to believe how quickly time has flown by. The 2023-2024 academic year has been an eventful one for the Lemon Bay High School Band Program. Our students have achieved great success, both individually and as a group, and I'm incredibly proud of the hard work and dedication they've put in this year. We're excited to present our final performance of the year, which is a culmination of the efforts of our students.

The Spring Concert is always an emotional time as we bid farewell to our graduating seniors and look to the next year with anticipation and excitement. I want to thank our seniors for their immense contributions to the Band Program during their time at Lemon Bay. I also want to express my gratitude to our Band Parents for their unwavering support throughout this year. Last but not least, I would like to thank our sponsors (listed throughout our program) for their generous contributions. Without their support and encouragement, our success would not have been possible.

We hope you enjoy our final performance of the 2022-2023 academic year and take a moment to reflect on the memories created throughout the year. To our seniors, we wish you all the very best in your future endeavors, and to all our students, we look forward to another incredible year of music. Have a happy and restful summer!

Sincerely,

Philip J. Eyrich

Why Music?

Music is a Science...

It is exact, specific, and it demands exact acoustics. A conductor's full score is a chart, a graph which indicates frequencies, intensities, volume changes, melody, and harmony all at once and with the most exact control of time.

Music is Mathematical...

It is rhythmically based on the subdivisions of time into fractions which must be done instantaneously, not worked out on paper.

Music is a Foreign Language...

Most of the terms are in Italian, German, or French; and the notation is certainly not English - but a highly developed kind of shorthand that uses symbols to represent ideas. The semantics of music is the most complete and universal language.

Music is History...

Music usually reflects the environment and times of its creation, often evoking the country and cultural feeling.

Music is Physical Education...

It requires fantastic coordination of fingers, hands, arms, lips, cheeks and facial muscles in addition to extraordinary control of the diaphragm, back, stomach, and chest muscles, which respond instantly to the sound the ear hears and the mind interprets.

Music is all these things, but most of all:

Music is Art...

It allows a human being to take all these, dry, technically boring (but difficult) techniques and use them to create emotion. That one thing science cannot duplicate: humanism, feeling, emotion.

That is why there is Music.

Not because we expect you to major in music

Not because we expect you to play or sing all your life (although how wonderful would our world be if you did???)

Not so you can relax

Not so you can have fun

But...

So you will be human

So you will recognize beauty

So you will be sensitive

So you will be closer to an infinite beyond this world

So you will have something to cling to

So you will have more Love,

Compassion,

Gentleness,

Good

In short – MORE LIFE.

Of what value will it be to make a prosperous living unless you know how to live?
